

Monday eve.

April 3, 1944

Dear Home folks:

Guess you will be suprised to get this letter, ~~but~~ as you all owe me one, but as I was sending some things home, I thought I better write a few lines. Hope this finds you all well, I dont feel very good now as I have a head-ache.

I thought you all could use those bath cloths as they were too small for me, and Dennard can use the table paper, you all use the shoe strings and Ellis can use the belt. I found the small Kakahi shirt and had it dry-cleaned, momma you can make Howard a shirt out of it, I think it is too small for Dennard. You can give the tobacco to Alford or some-one if he dont want it. You can put the other things of mine in the trunk. You see I wanted to get those things home as I didnt need any of the things except the bible, but you can take care of it better than I can and I have a new testament that I read too. I would have mailed this letter ahead of the package but I didnt have time to write it

2

this morning before I mailed the package. Guess I will send that Cap home pretty soon (the one I was wareing when I was down there) as they have stoped us from wareing them, we have to ware those little skull Caps now.

I wonder why E. D. dont write me. I just got one Card from her in about a month. Have you heard from her lately? it worries me for her to do me that way.

Oh yes did you all get the books O.K.? Hope so. That Tobal Co is some that I found, I didnt buy any of it or the other that I sent with the box of rope and things.

How are you all getting along with the work? sure hope you are having nice weather now. we got a nice rain here Saturday night, the second rain we had you might say in over three months.

I heard that we might have to move pretty soon, sure hope I dont as I am due to get a furlow in next month. How is Alford & Empie? I havent heard from them in a good while. Say Ellis what did you learn from the draft-board? hope you got a ~~permenant~~ permenant deferment. Trusting I will hear from you all real soon.

Love,

Lenard.
