

LUMBERJACK

Foreward

The 1978-79 Lumberjack Annual Staff is pleased to present this year's edition of the Lumberjack Yearbook to our students, faculty, and patrons of our school. We have earnestly striven to portray the daily activities, as well as the memorable moments of our school year.

We have enjoyed working together to make this annual one which you will fondly cherish. We hope, that as the years pass, you will be able to recapture the feelings and happy moments of the year we have shared together.

The 1978-79 Annual Staff

In Dedication to

Mrs. Bettye Greer

The Lumberjack Annual Staff is pleased to dedicate this year's edition to Mrs. Betty Greer, the wife of DHS principal, Mr. Bill Greer. Mrs. Greer can be found in the front office every day faithfully taking care of all the big and little problems that arise from time to time. She keeps us reminded of the important details that need to be taken care of, such as scheduled events, class rings, invitations, caps and gowns, and whatever else that students and faculty need. She is both a problem solver and a problem preventor. She helps keep us all on schedule and out of trouble. We appreciate you, Mrs. Greer!

These elected members are dedicated people who have contributed their time and efforts in increasing the quality of the school. Annual Staff

Superintendent of Diboll Schools

Dear Friends,

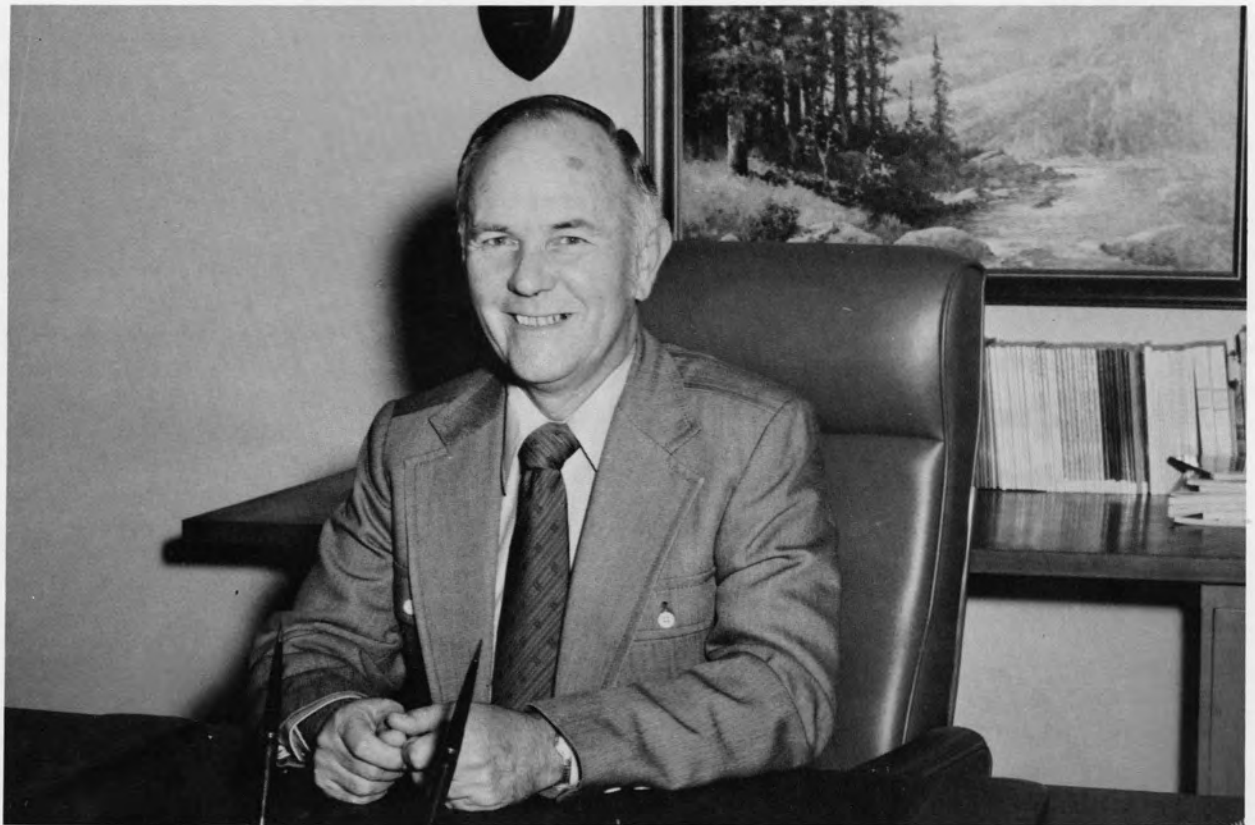

Life is a kaleidoscope of hustle and bustle with a constant change of patterns. As it shifts suddenly and quickly, so does our very existence depend on our ability to make use of the opportunities that offer themselves for such a short period of time. If not taken advantage of they swiftly fade away, never to return. Spend your time wisely and well and be ready to act when opportunity knocks on your door.

The best years are now for those who become involved in the world around. Let the record you leave behind be a positive, contributing one, and your future be bright and fulfilling!

Sincerely,

Donald E. Robbins

Curtis Rigsby died on February 17, 1979, of an apparent heart attack. He was only 14 years old. We, the annual staff take this means of paying tribute to this very special person. He was known and loved for his amicable manners and winning ways. Despite his crooked spine and handicapped body he was a strength and blessing to all of us.

Even though Curtis and his friendly smile is gone, he will long be remembered in the thoughts of the people that knew him.

As we work on today's problems by constantly improving our pollution control systems, cutting our own energy use by 336,000 cubic feet of gas per day, and investing in production machines to meet the world's increasing demand for LUFKIN energy-producing equipment, we realize that answers for tomorrow's problems will come from today's students. That's why we support East Texas schools and deserving students with scholarships and employment opportunities for business/vocational students. Ours is a two-fold commitment to continue to serve East Texas as a "good citizen" both today and tomorrow.

When Thomas Louis Latane Temple stepped off the train eighty-two years ago, we became a part of Diboll. We've grown quite a bit since 1894 and now Temple Industries is part of an organization with offices in places like London and Paris, New York and Madrid. The future holds great promise, and we're understandably proud of our growth. But mainly we're proud of being a part of the finest group of people in the world...the folks of East Texas.

SAVING TIPS on electric air conditioning

Central Systems

1. Set thermostat on 78°, or higher.
2. Have equipment checked seasonally by qualified serviceman.
3. Check filter every 30 days. Clean or replace when dirty.
4. Keep furniture, draperies away from air outlets and returns. Clean grills often.
5. Close draperies and blinds to keep out sunlight.
6. Keep fireplace damper closed.
7. Proper home insulation keeps heat out, cuts energy use.
8. Weatherstrip doors and windows. Caulk cracks.
9. Keep windows closed. Open outside doors as little as possible.

Window Units

Follow above suggestions, plus these:

10. Buy units with *highest* "energy efficiency ratio" (EER). If EER is not on sales tag, ask for it or figure it yourself. Divide "wattage" into "BTU" capacity.
11. Place unit where it'll get as little direct sun as possible.
12. Aim air outlets at lower half of doorway to next room to allow warm air from that room to enter at the doortop for recooling, recirculation.

If you would like additional information on conserving electricity, call the Customer Service Representative in the TP&L Office.
