

The Foundry Roundup

OCTOBER, 1968

From the PRESIDENT'S DESK...

FELLOW EMPLOYEES:

The most important thing you can do for your country regardless of your station in life is to cast your vote in each and every election, whether it be at the precinct, city, county, state or national level.

History indicates that your vote could be this important. Two presidential elections in the last twenty years—those in 1948 and 1960—were decided by a margin of less than one vote per precinct. Right here in East Texas, a county sheriff was elected by a single vote in 1964.

This is a key election year, and many of those elected will make decisions affecting the fate of our nation and even the world. Your vote could help decide who makes these fateful decisions; therefore, you should cast your vote and know whom you are voting for. Probably in no other national election year have we faced so many domestic and international issues so crucial to our nation's survival.

Learn all you can about each candidate, and make your own decision after you are convinced that the candidate of your choice is the one that will best serve the country and its people.

Do not overlook the small local elections that seem so insignificant. Often these elections at the grass roots level affect us more so individually than the larger more publicized state and national elections.

If you do not vote and fail to exercise the right you have as a citizen of this great country, then you have forfeited one of your most cherished freedoms.

If your vote is cast November 4, it will count; and this year it could count for deciding the destiny of you and your land.

R. L. POLAND

Administrative Vice President Bayo Hopper addressed the company's summer employees, who were honored at a dinner party August 15.

PARTY for Summer Employees

Lufkin's 95 summer employees were honored with a dinner party August 15 at the Piney Ridge Club.

J. T. Long, personnel director and organizer of the get-together, estimated that 100 employees attended, including departmental supervisors and most of the high school and college students who worked in the plant and branch offices during the summer.

Long says he is pleased with the excellent reports he received on the students' work. To encourage Angelina County's youths to continue their educations, the company employs students in the shop areas and offices during their summer vacations.

He said that some of the students will continue to work this fall on shifts arranged to allow full class schedules at Angelina College and Stephen F. Austin State College. Many of the summer workers are sons of Lufkin employees.

The group gathered on the front lawn of the lodge where Bayo Hopper, administrative vice president, thanked them for their co-operation and contribution to the company's production. He encouraged them to return to Lufkin after completing their educations, pointing out that six of the company's nine officers are natives of Lufkin.

Four local karate experts entertained the group with a demonstration of the basic skills. They also commented on the theory and history of the ancient Chinese form of defense.

Mutt Barr practiced trap shooting as Dude Schuller, Johnny Long and the summer employees waited for their turns.

The estimated 100 guests feasted on fried chicken at the Piney Ridge Club.

Gathering on the shooting range, several departmental supervisors and most of the student employees practiced trap shooting. The target practice followed an exhibition by members of the Pines Gun Club, who also made comments on proper gun safety measures.

A fried chicken dinner completed the evening.

WORKERS who will be soliciting gifts for the Community Chest include, beginning left, clockwise: JACK ROBERTS, Pipe House; RODNEY BRAZIL, Material Control; BENNIE LATHAM,

Tool Room; E. O. TAYLOR, Welding & Structural Shop; BARBARA FOWLER, Plant Office; EARL DAVIS, Mill Supplies; SMITHIE REEVES, Machine Shop; DAVID MASSINGILL, Commercial Gears. Right JOHN LONG, Personnel Director.

AN EDITORIAL

By VIRGINIA ALLEN

EACH of us knows there is a constant drain on our pocketbooks as the cost of living spirals ever upward. This may tend to make us tighten the strings on what we may call the "extras" that we feel we can do without.

This month is Community Chest month in Angelina County and throughout most of the United States. Is this an "extra" that we can do without? We believe not.

The Agencies of the Community Chest work around the clock to provide: assistance to those who are the less fortunate; help to those who cannot through physical or mental handicap do for themselves; training, leadership, guidance for those children and youth who make our world of tomorrow a better place in which to live; books in our libraries which open doors to knowledge and a better life; foster homes and tender, loving parental care to abandoned, neglected and mis-

to GIVE...or

treated children who are blameless for the circumstances they are in; warmth, friendship, concern for our boys stationed in foreign lands; and many, many more acts that we as individuals would gladly do if someone stood at our door and asked for help.

All this work is done by Community Chest agencies—but in truth, it is you, for they can act only through you and your gifts.

In a few days, volunteer workers will come to our work stations and ask if we wish to give. Before we answer or reach for a few cents change, let's think for just a moment.

Emerson, the philosopher, wrote, "We have a great deal more kindness than is ever spoken . . . but the heart knoweth."

Our hearts have the capacity for boundless understanding. Deep within us, we know that we "are our brother's keeper." Sometimes, it is diffi-

THESE are some of the Community Chest workers in the plant. Beginning left, clockwise: CABE CLONTS, Trailer Division; JOHN LEE SLAUGHTER, Trailer Offices; THEDIS ALLEN, Welding & Structural; GERALD KENDRICK, Welding & Structural; GEORGE GIBBS, Main Offices, and JOHN LONG.

Not to GIVE

cult not to put self first.

Again, Emerson wrote, "from the highest degree of passionate love to the lowest degree of goodwill, human affection makes the sweetness of life."

Let's look at our record of giving last year. Our employee giving totalled \$5,821.10. The Company gave \$6,093.76. Perhaps that sounds like a lot of money for 1963 employees.

Out of 1400 men, 10 gave a day's pay. Of all the office employees and supervisors, only 44 gave a day's pay.

These next figures may interest you. Last year, 51% of Machine Shop and Welding Shop employees did not give anything; neither did 50% of the Trailer Division, nor 28% of the Foundry department, nor 44% of the office employees.

There are 16 agencies in the Community Chest. If each of us gave \$1.00 to each agency during separate drives throughout the year, we would have

given \$16.00. But some of us give \$1.00 to the Community Chest which must be divided 16 ways.

Giving to charity is a personal thing and we answer only to our consciences. If we give to the Chest through our Company, then it means more money for the Chest because the Company matches our gifts. Also, 10 percent of all we give through the Company comes back to us as an emergency relief fund for our own employees.

We human beings use many excuses about giving. We say we won't give because we don't approve of one or perhaps two agencies in the Chest. Or we say we will give our gift through our church or our lodge or our union. Or we say, "My wife gives where she works," or, "My husband gives for us."

Are these just excuses?

A great man, Kahlil Gibran, once wrote: "You often say 'I would give but only to the deserving.' The trees in your orchard say not so, nor the flocks in your pasture. They give that they may live, for to withhold is to perish. Surely he who is worthy to receive his days and his nights, is worthy of all else from you. And he who has deserved to drink from the ocean of life deserves to fill his cup from your little stream."

To give . . . or not to give? Only you can answer.

Shop Talk

THE son of DUDLEY C. FLENOY, Foundry department, first shift, has returned to the U.S. Naval Air Station, North Island, San Diego, after his six-month deployment to the Western Pacific with Airborne Early Warning Squadron III, Detachment 10.

Airman Gregory Flenoy, while stationed aboard the anti-submarine warfare carrier USS Yorktown, was a member of the aerial detection crew which traced submarines posing a threat to the United States or its allies.

He also helped in the areas of search and rescue (SAR), weather reconnaissance, and radio and radar relay.

Congratulations to newlyweds Mr. and Mrs. Bobby D. Hill. The bride is the former Judy Louise Ray, daughter of OLEN E. RAY, Trailer division, second shift.

JAMES OATES has been missed during his illness. He works in Welding and Structural, first shift.

Mr. and Mrs. JIMMY FOSTER announce the birth of a baby daughter. The new father works in Welding and Structural, first shift.

Congratulations to Mr. and Mrs. JOHN WIGGINS, who were recently married. The new bridegroom is employed in Welding and Structural, first shift.

P. P. "BUCK" STRINGER is back at work in the Welding and Structural shop after his recent operation.

We congratulate newlyweds Mr. and Mrs. JOHNNY FAIRES. He is employed in Welding and Structural, third shift.

Sympathy is extended to GLENN BRIDGES, Foundry department, whose grandmother died.

LEVI PATTON has been missed by his co-workers in the Foundry department, second shift. He is recuperating from a car mishap.

THE ROUNDUP extends sympathy to VERNON NIXON whose sister died suddenly. Vernon works in the Pattern Shop, first shift.

Mr. and Mrs. Bobby Dale Hill

Congratulations to Mr. and Mrs. RAYFORD C. Y'BARBO, who were married recently. Rayford is employed in Welding and Structural, third shift.

Another Welding and Structural employee, ARTHUR LEE DONNELL, was recently married. His bride is the former Linda Segrest of Redland.

We hope O. C. MYERS has recuperated from his foot injury. He was missed by his fellow workers in the Foundry department, first shift.

CARROLL EASTEPP, Assembly and Shipping, first shift, has every reason to be proud of his daughter, Dorthy, who won two distinguished college titles last year.

As a junior home economics major at Stephen F. Austin State College, Dorthy was selected "Outstanding College Chapter Worker" for the 1967-68 school year. The SFA home economics department also named her the "Outstanding Undergraduate Student" during

the past year.

Best wishes to Dorthy as she continues her studies this fall.

We send words of sympathy to JOHN WAYNE SMITH, Foundry department, first shift, whose 6-year-old brother was drowned during a fishing accident in Florida.

Foundry department employees welcome RALPH MITCHELL back to work following his three-week illness.

When GUS LYNCH retired after 24 years of loyal service in the Trailer division, his co-workers presented him with a Bible engraved with his name. Gus maintained an outstanding record by never being late to work.

He says he plans to catch up on his fishing during the coming years of retirement. Lufkin Foundry thanks Gus for his fine record and his years of devoted service. We wish him many happy, healthy years of retirement.

Dorothy Eastepp...
home economics awards

DELBERT ELLISON, Trailer division, wrote the following poem expressing the feelings of Gus' co-workers:

Who's the man who has a smile for everyone

Who's always picking, joking, teasing and bringing fun

Who's the man who's come a long way

Singing and praising the Lord each and every day.

Who's worked and toiled 'til his clothes are soiled and never does complain

Who's always here on time in winter or the rain

Who's the man with a heart of gold
Loving everyone with a Christian soul.

Who's that man in bib overall
With the wisdom that surprises all
Though his race is black and mine is white

With the Bible in our hand we will always find the light.

Sympathy is extended to the family of KERNS BAILEY who died in August. He was a retired Machine Shop employee.

Special greetings to ZACK FENLEY, Pipe House foreman, who is steadily improving since his heart attack.

Gus Lynch . . . presented with Bible

Our congratulations go to the CECIL HUNTS, who were married recently. Mrs. Hunt is the former Carlotta Lehmann. Cecil works in the Main Office.

MORGAN FLOURNOY is back at work in the Industrial Engineering department. He has been in the hospital recuperating from an accident.

Congratulations to Mr. and Mrs. ROBERT BEARD who were married in August. Robert works in the Machine Shop, third shift.

The son of ROBERT MCNEELEY, Jig department, first shift, married the former Cheryl Hopson of Nacogdoches on Sept. 12. Congratulations to Mr. and Mrs. Michael J. McNeeley, who will live in Nacogdoches while she finishes her education at Stephen F. Austin State College.

Robert's son-in-law recently returned from duty in Vietnam where he was a member of the army's First Cavalry

Division. Specialist, fifth class, Joe Kelly was formerly employed in the Trailer division.

HAROLD WEEKS, Gas Engine department, became a grandfather twice during the summer.

Margaret Annette weighed 8 pounds, 7 ounces when she was born on Sept. 2. Her parents are Mr. and Mrs. Gary W. Wells.

Another granddaughter weighed 6 pounds, 11 ounces when she was born on July 18 in Evansville, Indiana. Wendy Lee's father is Sp/4 Morris Weeks, who is a paratrooper with the 101st Airborne Division in Vietnam.

When the HUBERT LANKFORDS and the W. J. WILSONS took their recent vacation to HemisFair together, they went to every extreme to keep in contact. The couples hooked short wave radios to their cars and chatted all

Kimberle Shuell . . . 3-years-old

Left: Vicki Walther . . . tennis champion

the way to San Antonio and back.

Both men work in the Machine Shop, second shift.

We are sorry to hear that ED ROOT, Trailer division, first shift, has been in the hospital.

We extend sympathy to JOHN COPELAND, Machine Shop, and E. L. COPELAND, Foundry department, whose mother died.

The MILTON WALTHER family may

have to build a trophy case if 14-year-old Vicki keeps bringing home tennis trophies.

She won the District 8AAAA title in the junior girls singles at the Tyler District Tournament. Vicki represented Lufkin Junior High School, where she is a ninth grader.

This summer Vicki won three other trophies at tournaments sponsored by the United States Lawn Tennis Association.

She and her partner took first place honors in the doubles event for girls

16-years-old or younger at the Lufkin Open Tournament. She was also a runner-up in the singles event.

At the East Texas Tournament in Tyler, Vicki was runner-up in the doubles event for girls 18-years-old and younger.

She was also a runner-up in the singles event at the YMCA Labor Day Tournament in Beaumont.

Vicki's brothers are also tennis enthusiasts. Steven, a sophomore at Lufkin High School, was a member of the junior high tennis team last year, and Bruce, 12-years-old, also entered the Beaumont tournament with his sister.

Their father works in the Engineering department.

R. B. SMITH, Trailer division, became a granddaddy on August 30. The parents of his new granddaughter are Mr. and Mrs. C. E. Smith of Mt. Enterprise.

Little Kimberle, daughter of Mr. and Mrs. MIKE SHUELL, celebrated her third birthday on Sept. 8. Her father works in the Machine Shop, third shift.

Remember September 4—the day of The Rain? While parked cars floated in the waist-deep rain drainage, the water level crept to the top steps of the Main Office.

Water stood several inches deep in

Mr. and Mrs. Hubert Lankford and Mr. and Mrs. W. J. Wilson . . vacationing at HemisFair.

Cars were stalled at Jefferson and Raguet in front of the Personnel Office when an afternoon rain created a flash flood.

the shops. Trailer plant employees said they would have to start wearing fishing hip boots if we continued to have those afternoon rainstorms. The side jigs, which are six feet deep, were over-flowing.

With "tongue in cheek," Welding Shop employees expressed their thanks for the repairs on Harrell Street, where "only" nine accidents occurred that day.

GAYLAND WALLACE, Lathe Shop, first shift, moonlights as a dog trader, and he's pretty successful at it—when he can keep up with his dogs.

When he got back from a trip to Canton, Texas, he was minus his trailer and seven dogs (somehow the eighth one found its way home). Apparently, his trailer came unhitched in Tyler.

BOB McBRIDE's cartoon of Gayland's predicament is found on these pages. Bob works in the Engineering department.

The fellows in the Maintenance department, first shift, missed C. D.

CONGRESS does not have to probe too deeply to find ways to make some hefty cuts in federal deficit spending, according to "Washington Report," official publication of the Chamber of Commerce of the United States. The Report says a building a few blocks away houses the Subversive Activities Control Board, and Congress could start right there.

SACB was established in 1950. Its job was to expose "Communist-action" or "Communist-front" organizations and force them to register so that everybody would be aware of their affiliations. There is no question that it did a credible job for a while—until its wings were clipped by a Supreme Court decision.

The Court ruled that requiring Communists to register would violate their Constitutional rights not to incriminate themselves.

So, the Board found itself with little to do, and in the past two years has done nothing. It hasn't held a single meeting—let alone a hearing—to justify its existence in that period. Yet, it continues as a federal agency, and at an exorbitant cost to the taxpayers.

In fiscal 1967, SACB spent \$280,000, most of it—\$254,989—in salaries for 17 people. Each of the five Board members received \$26,000. Now, with the new federal pay raise, the rate is \$28,000. In 1968, six of the 12 staff people received Civil Service Grade 10 pay, from \$8,900 to \$11,500 annually—a rather large number of higher paid employees.

In view of the Board's extended period of inertia, it could come as a surprise that SACB has asked for an increase in its appropriations to \$425,000 in 1969. Some of the money would go for five more staff members.

Some spending-conscious legislators have tried to kill the Board outright. Failing that, they did get through an amendment that would have compelled it to disband after Dec. 21, 1968, unless it could find something to do.

But, miraculously, it got some work.

Attorney General Ramsey Clark sent it seven petitions asking the Board to enter orders finding that the seven persons named were, or were not, members of the Communist Party. To reduce the Board's burden, he sent along information as to the offices the Justice Department believes the seven hold in the party.

His motives are unclear. But it couldn't possibly be that the Board has to be retained to allay any fears that its termination would indicate the country is going soft on subversive elements.

"Washington Report" then comments: "If the country is going soft, it's in the head—to permit the continuation of wasteful agencies that add needlessly to the federal deficit. The present Congress still has time to squash this plum from the patronage tree."

SHOP TALK *continued*

"SLIM" FOSTER while he spent a week in the hospital.

Newlyweds Mr. and Mrs. Jimmy Wooten III are now living in Dallas, where he is employed by Collins Electronics.

Jimmy met his wife, the former Colleen Beck of Australia, while his job sent him all over the world setting up tracking stations and programming the Apollo space shots.

His company has branch offices all over the world supplying communications equipment to the armed forces. In preparation for this type of work, he earned a bachelor's degree in electronics from The University of Texas.

Father of the new bridegroom is JIMMY WOOTEN, Trailer division, first shift.

DANNY STANBERRY's brother recently has been home on leave from Navy duty. Airman Ronnie Stanberry has been aboard an aircraft carrier near the coast of Vietnam. Danny works in the Trailer division.

CURTIS "FIDDLER" STEVENS, Welding and Structural, has been missed by his co-workers during his illness.

T. D. LASHLY, Engineering department, should adopt a new slogan—If You Smoke, Don't Drive.

After a recent company camp-out, T. D. was driving home and dropped

his cigarette in his lap. When he glanced down to retrieve it, his pickup truck ran smack-dab into a tree. (T. D. swears that tree was growing in the middle of the road.)

BOB McBRIDE captured the incident in a cartoon, which is found on these pages.

The fellows in Welding and Structural said they are relieved that CURLEY WILLIAMS' recent accident was no more serious than it was. We hope he has recuperated by now.

Congratulations to Mr. and Mrs. JAMES T. CATES, who were married Aug. 9. She is the former Rebecca Jo Henson and James works in the Machine Shop, second shift.

CHARLES CAMPBELL, Tool Room, first shift, drew a cartoon of A. J. HAVARD and ERNEST LATHAM on their fishing trip in late August. A. J. says he spent most of his time pulling slue-footed Ernest out of the water.

Both are employees of the Machine Shop, first shift.

At a modern art exhibition, first prize in sculpture went to a curiously shaped form bearing the sign, "The sculptress shaped this entirely with her tongue."

Someone questioned the exhibitor, "Who is this talented sculptress?"

"My cow," was the reply. "That's her salt block."

Experience is a wonderful thing, for it enables you to recognize a mistake when you make it again!

What hardships our forefathers endured! Imagine pushing westward day after day—without sunglasses.

Blacksmith (to apprentice): "When I take the shoe out of the fire, I'll put it on the anvil. When I nod my head, you hit it with the hammer."

The apprentice did exactly as he was told and now he's the blacksmith.

Husband: I bought something today for the one I love best. Guess what.

Wife: A box of cigars.

It looks like they're gonna cure everything before we're eligible for Medicare.

Poet: "Burglars broke into my house last night."

Friend: "Yeah? What happened?"

Poet: "They searched through every room, then left a \$5 bill on my bureau."

"What's worse than eating hash at a restaurant where you don't know what's in it?"

"Eating it at home where you do know."

Americans have always prided themselves on their resourcefulness as soldiers. One young draftee was driving a car for a bachelor major who had a keen eye for the pretty girls. This officer saw a beauty walking along the sidewalk in the opposite direction.

"Turn the car around," he ordered, hoping to give the girl a lift. The driver clumsily killed the engine and then had so much trouble getting it started again that the girl was out of sight before he could get the car moving again.

"Soldier," snapped the major in disgust, "you would be a total loss in an emergency."

"No, I wouldn't sir," replied the soldier. "That was my girl."

Two grammar school boys were talking about a girl playmate.

Said one to the other, "I've carried her books to school three times and bought her sundaes twice. Now, do you think I ought to kiss her?"

"No, you don't have to kiss her," said the other kid. "You've done enough for that girl already."

Voice over telephone, "Timmie Hagan will not be in school today."

Teacher, "Who is this speaking please?"

Timmie, "This is my father speaking."

Benny: Mamma, I've seen a man who makes horses.

Mom: How do you know?

Benny: He had one nearly finished when I saw him. He was just nailing on the back feet.

He's the type who likes to bug people. Like yesterday he wrote to the Encyclopaedia Britannica people and asked them when it was coming out in paperback.

A motorist received a bill of \$41 from a service station for tuning up the engine of his car.

"For pete's sake!" he exploded. "Who does the tuning up around here —Leonard Bernstein?"

After a lifetime on the farm, Mom had retired to the city. She liked all the modern conveniences in her new house but couldn't figure how to use the gas stove. At last she called on Mrs. Next-door, who showed her how to light it.

Some time later, the two women met in the street. "How are you getting on with your stove, now?" asked Mrs. Next-door.

"Oh, fine," replied Mom. "It's almost a month now since you lit it for me and it hasn't gone out yet."

Steven: Did I ever tell you about the time I came face to face with a lion?

David: No, what happened?

Steven: There I stood without a gun. The lion growled ferociously and crept closer, closer . . .

David: What did you do?

Steven: I moved on to the next cage.

First gardener: I used to work with 2,000 men under me.

Second gardener: Really?

First gardener: Yep. I cut the grass in a cemetery.
